

Bowman and Brooke LLP

Sector Focus: Legal

From a "Powerful Presence in the Courtroom" to a fierce presence in the office, Bowman and Brooke LLP partnered with the Smith Group to create an innovative interior environment for its Minneapolis, MN, location that reflects the company's attitude towards the environment, cultural expression and design excellence. LEED® certified for Commercial Interiors, this workplace upholds the company's commitment to sustainability. Boasting the first LEED certified law office in Minneapolis, Bowman and Brooke was able to realize this environmental achievement using the Knoll AutoStrada™ and Reff® office systems.

AutoStrada on the open plan, cover and right, features a Quartered Sycamore veneer on panels, with Reff overheads in Anigre and Calibre® files. Environmentally-friendly Life® chairs provide unsurpassed ergonomic support, while custom transaction counters in marble add to the lively materials palette. In the private office, left, Reff offers planning flexibility and technology support. A beautifully-proportioned wood furniture platform, Reff is exquisitely detailed with an eye toward casegoods precision. Both AutoStrada and Reff are manufactured using clean technologies, including water-based adhesives and VOC-free wood coatings.
